

Installing Forward Station Code List onto the Instrument

To setup the codes required for the *Forward Station* program you must copy the 3 codes files

- Codes.X06
- Codes.X23
- Codes.XCF

from *C:\MineSolutions\MSO\ForwardStation\Help* into the *Code* directory of the *SD* or *CF* directory of the card for your instrument

Next is to copy the code list into the memory of instrument:

On the TS15 (VIVA instrument)

menu options USER → Tools and Utls → Transfer User Objects →

Select Object to transfer _ Codelist

From SD Card

To Internal Memory

Select the Codelist and Select F1 to copy across

On the 1200 series instruments

menu options Tools → Transfer Objects → 01 Codelists

From CF Card

To System Ram

Select the Codelist

F1 to continue and copy the codelist across.
