## PonFarr V1.03

## Release Notes

10<sup>th</sup> November 2015

### Version Highlights

-  64 bit compatibility! *PonFarr* will run under the dedicated 64 bit version of *Surpac* running on 64 bit *MS Windows*.
- Compatibility issues with the recently released *Surpac V6.7* have been resolved and tested.
-  The *PonFarr* installer has been re-written to cater for both 32 and 64 bit versions of *Surpac*. Computer registry entries are no longer created to assist with compatibility in restricted computing environments.

## Important Note on Surpac 64 Bit Compatibly

Please note that *PonFarr V1.02* and all previous versions **will not function** on the 64 bit versions of *Surpac*.

*PonFarr V1.03* is now **compatible with 64 bit versions of Surpac**. Note that both 32 bit versions and 64 bit versions of *Surpac* with *PonFarr* can coexist on the same computer.

## New Installer

The installation program for *PonFarr* has been re-written to solve a number of issues. It now correctly detects all versions of *Surpac* including 64 bit installations.

The previous installer wrote a key into the computers registry which generally required computer administrator privileges. This no longer happens making the program easier to deploy in a restricted environment. A normal user should be able to run the installer.

The installer contains all files for both 32 bit and 64 bit versions of *Surpac*, separate installers are not required.

## Recommendations

The following versions of *Surpac* have been tested with *PonFarr* and appear to be stable;

- Surpac 6.3+
- Surpac 6.4+
- Surpac 6.5+
- Surpac 6.6+
- Surpac 6.7

It is recommended to gain the full benefit of *PonFarr V1.03* that you use *Surpac V6.3* or better
